## FORD MOTOR COMPANY

Automobile Manufacturers.

Detroit, Mich., Dec. 29, 1920.

### All Ford Dealers :

Several inquiries have recently come to us concerning the likelihood of another reduction in the price of our cars, and as the inquiries no doubt emanate from prospective purchasers, we want to state again with greater emphasis that Ford cars are already being sold at a figure actually below cost and for an indefinite period another reduction or change in design is entirely out of the question and not at all contemplated.

We believe the public will be fair enough to fully appreciate the frankness of the above when they consider the extent of our recent price cut which was in fact the equivalent of several reductions in one, in our desire to contribute toward satisfying their demands for lower living costs notwithstanding our sacrifice in marketing our cars at a loss until we are able to materially reduce present costs through lower material prices and greater manufacturing efficiency. While we have of course made some progress in bringing down operating costs, we still have a long way

to go before any thought can be given to further reductions in present car prices, so we have no hesitancy in making these open statements to acquaint you with the true situation.

You can therefore give assurance to prospective purchasers of Ford cars that now is their real opportunity to buy below cost and obtain delivery. Everyone is familiar with the heavy demand for Ford cars in the Spring and this year will be no exception, as in spite of conditions, business is already rapidly accumulating, so that many who desire Ford cars will be obliged to wait perhaps until mid-summer for delivery causing considerable inconvenience and possibly financial loss, particularly to commercial customers.

We expect you to protect the interests of prospective buyers in your community by placing these facts before them.

Yours very truly,  
FORD MOTOR COMPANY,  
W. A. RYAN,  
Manager of Sales.

Judge John S. Horton, Alfredton, was moving around amongst us on Tuesday and came in to shake hands.

### FINISHED HIS PLOWING.

W. M. Mundy, who lives in the Cavants Creek neighborhood, was in the office several weeks ago, and stated that he had broken already all his land for this season's crop of corn and expected to use some fertilizer and try for at least seventy five bushels per acre, and if season suits expected at least that number of bushels per acre.

Ground for corn should be broken during the winter season, particularly sod land. The winter freeze pulverizes the soil, and at the same time destroys the eggs of insects, and invariably insures a better crop. Another advantage—winter plowing gets that heavy work off and out of the way. To leave off until spring often, on account of bad weather means a rush and late planting. It would appear the wise thing to do—keep the plows running at every opportunity during the winter months.

### COTTON REDUCTION.

Cotton is grown in about 15 Southern states. The largest grower is Texas, with 4,200,000 bales, in 1920. South Carolina next with 1,500,000 bales and Georgia, 1,400,000 bales. A bale weight 500 lbs. In 1914 spot cotton sold at 7 cents on the market. The price rose to 40 cents in 1919. In July 1920 the price rose to 44 cents and 50 cent cotton was talked of. But, it started down the toboggan, and by the end of 1920 was 14 3-1 cents.

### THE HOWLERS.

Editor of The News:

Just a few years ago when the Germans were devastating game little Belgium and hurling her thunder bolts of war and using poison gas to conquer the world and make it subservient to her so-called imperial will, to what people did the world look to save humanity from such degradation? When Belgium, France and England were saying, "Oh, that Blucher would come!"—when the time came to negotiate for peace, who was it that spoke for humanity And when that man, President Woodrow Wilson, spoke, in the midst of turmoil and strife, who said he was wrong? Not a man in or out of Congress (while the strife was going on). Everybody was praying that his promulgation would have effect. No one in print that I recall reviled the president until after the armistice was signed. He, as we learned afterward, consulted the brainiest men in both the republican and democratic parties—many of them offering suggestions which were adopted. Who said the president was wrong, or offered any constructive advice which was not considered while negotiations were going on? Not a soul in or out of Congress.

Now, at the present time, who is raising indignant clamor about having built wooden ships while the war was going on—when everybody—England, Belgium, France and all the civilized world were praying for "ships, and yet more ships." The hope of humanity was: "Build them faster than the Germans can sink them!" and it was done. Now, who is kicking? Why wasn't there a kick while the building was going on? I

don't know anyone who holds a brief for Mr. Schawb. But why didn't some of the fellows who are so vociferous now say something and make themselves heard at the proper time? It is easy for one of even moderate intelligence to say, "I told you so," after the fellow who sweated blood to accomplish the task given or even thrust upon him.

Now, as to the check Mr. Schawbq is said to have personally received—everyone who knows anything at all knows that red tape had to be cut from Alpha to Omega to get the work done. Mr. Schawb had to no doubt had to circumvent and use his brains to get things done and done in time. It is puerile and mean, (besides, as Mr. Piez says, untrue), for some whipper-snapper to insinuate that Mr. Schawb took any money that did not belong to him.

"Half a truth is ever the blackest of lies. A whole lie may be met and fought with outright. A lie that is half the truth is a harder matter to fight."

## WILLARD BATTERIES

### U. S. TIRES

Did you know that your Battery would freeze and probably ruin if in a run-down condition in cold weather?

Now is the time to have your Battery over-hauled, and if you are not using your car, better let us store it for you until Spring. We can keep your battery in first class condition and deliver it to you at any time at a very moderate charge.

Did you ever stop to count the cost of running a tire with a blow-out patch in it?

It is one of the most expensive things that a car owner does. Dirt and water work through the hole and in a short time absolutely ruin the tire, besides the tubes you have ruined in the meantime. We can repair these tires for you at a price consistent with good work, and guarantee them to hold.

**School Teachers and Fords**

One of the Tazewell High School boys asked his teacher why she was so much like a Ford. Of course she didn't know. The boy did. He said, "Because teachers give the greatest amount of service for the least money." That's why the highways today are crowded with Ford cars—they give you the service and "they take you there and bring you back."

Better see us and sign a contract.
